

# Preparator

- Powerful drum picks up large rocks
- Perforated bucket allows small dirt/debris to fall through
- Bi-directional drum rotation, operates in forward or reverse

**A**ttack the toughest ground conditions, and take a job from “rough” to “finished” with ease. Collect rocks and debris and till compacted soil to “prepare” the perfect seedbed. The adjustable rolling drum conditions the soil and deposits debris into the perforated bucket. The Preparator® is available in three sizes to fit your skid steer loader. This tough attachment can pick up rocks from 1” (25 mm) to 20” (504 mm) in diameter, and the bucket dumps quickly and easily. The bi-directional drum works in forward or reverse and can till up to 2.5” (64 mm) deep.

Preparator is a registered trademark of Paladin Brands.

## Specifications:

Model	Hydraulic Flow, gpm (lpm)	Working Width, in (mm)	Overall Width, in (mm)	Bucket Capacity, ft <sup>3</sup> (m <sup>3</sup> )	Weight, lb (kg)
FP54	10-25 (37-94)	54 (1371)	62 (1574)	8.86 (0.25)	976 (442)
FP66	10-25 (37-94)	66 (1676)	74 (1879)	10.3 (0.29)	1270 (576)
FP76	10-25 (37-94)	76 (1930)	84 (2133)	12.5 (0.35)	1465 (664)
